VISUAL & PERFORMANCE ARTIST Portfolio: www.bluerachapradit.com

Born and raised in Thailand, my complicated relationship with my motherland drives me to explore the themes of home, the body, womanhood, and oppression. My art practice explores art as a medium for feminist protest. While my works are diverse in form, my projects are linked by a thematic focus on the personal as the political, feminist explorations, and a research-based approach, using my study of historiography, philosophy, feminist studies, and psychology to inform my practice.
